

Safe from contaminated  
air and each other

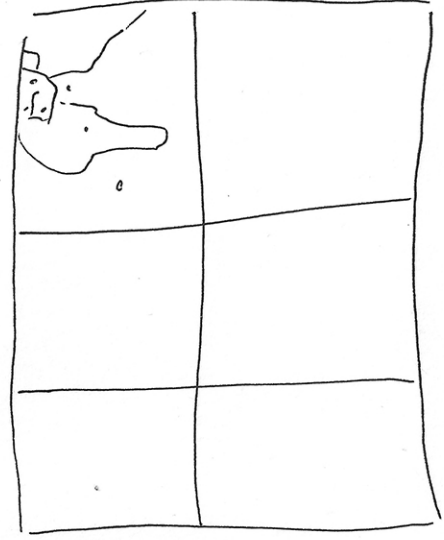

instead we put each  
student in an  
aquarium

and that worked  
until...

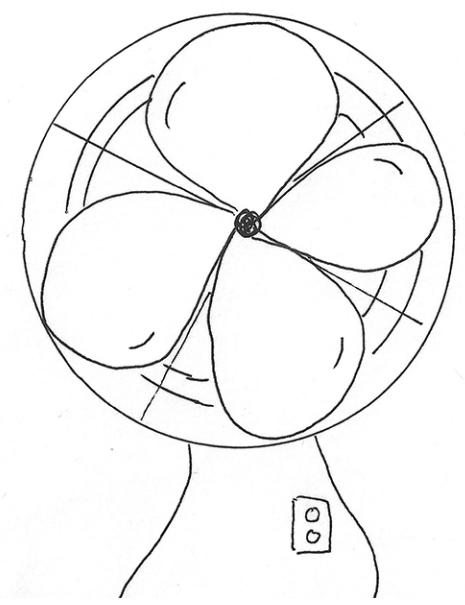

then we stacked  
the aquariums to  
make classrooms

escaped —

one by one  
the students

and also big fans to  
point at the  
students

I dreamed they gave  
us hair dryers to  
protect us when  
we — taught

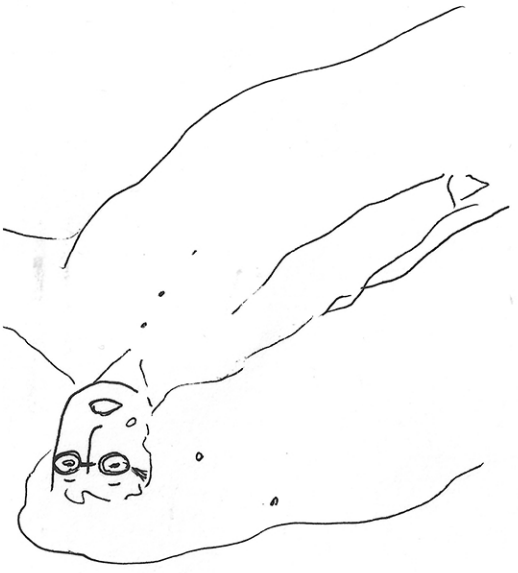

by  
Jesse Lee Kercheval

But that was  
just a dream —

swimming out to  
sea . . .

leaving me

alone —
